

**Success in design today relies on creative presentation. Hatch Manager gives you the tools to create and manage outstanding hatch patterns for maximum impact!**

▲ Hatch Manager's intuitive interface lets you browse libraries with ease.

Instantly create your own unique patterns ► plus add multiple PAT files from disk!

## OVERVIEW

Hatch Manager provides the solution to all your hatch creation and management needs. You can build entire libraries from scratch, add existing PAT files in seconds or create your own unique patterns from existing drawing objects. The software also links directly into the AutoCAD/BricsCAD Boundary Hatch (Bhatch) dialog, ensuring all your patterns remain fully featured with essential options such as associative, non-associative, edit boundary and pattern re-scaling.

With Hatch Manager, patterns are organised within distinct libraries with advanced viewing capabilities. They can be identified fast and are accessible right when you need them. Management tools ensure the library database is always up to date, with the ability to view and print pattern details and other library information. Patterns can be contained on local drives or on a network.
