OVERVIEW

Working with schedules and bill of materials are a critical component of any project. Creating these documents presents many unique challenges. Among them are deciding what to schedule, how to format it and most importantly accurately reporting it and keeping it up-to-date. GlobalCAD Schedule provides the effective and reliable solution to all of these issues. Its feature-rich toolset lets you query drawings for block attribute data and save it to a variety of file formats. Unique formatting options mean you can pre-set the style for each spreadsheet and export only the data that's critical to your needs.

Keep your Microsoft Excel spreadsheets synchronized with the Dynamic Link option. Simply edit the current workbook and your drawing updates automatically! Alternatively, you can work on spreadsheets remotely and update associated drawings all at the click of a button with the Import feature.
